

## COPPER CHROMITE BLACK

**Code: JHM-2822, JHM-2824**

**Product Info:**

Chemical Name: Copper Chromite Black

Chemical Components: Cu-Cr-O

Formula:  $\text{CuO} \bullet \text{Cr}_2\text{O}_3$

C.I.NO.: Pigment Black 28/P.Bk.28/C.I.:77428

CAS NO.: 68186-91-4

Crystal Form: Spinel-type

**Character:**

Good heat resistance, outstanding properties and lightfast with good chemical resistance, high covering power, non-toxic.

**Applications:**

It can be used in coating for rolled steel, vehicle, outdoor building, painting, roadmarking, camouflage coatings and powder coatings.

**Technical Data:**

Name	Main Partical size ( $\mu\text{m}$ ) $\leq$	Heat Resistance ( $^{\circ}\text{C}$ ) $\leq$	Light Resistance (Grade 1-8)	Weather Resistance (Grade 1-5)	Oil Absorption g/100g	Density $\text{g}/\text{cm}^3$	PH
Copper Chromite Black	1.5	1000	8	5	12-22	4.8-5.6	6-9
