

Journal Pre-proof

Design, synthesis, and evaluation of “dual-site”-binding diarylpyrimidines targeting both NNIBP and the NNRTI adjacent site of the HIV-1 reverse transcriptase

Da Feng, Xiaofang Zuo, Lanlan Jing, Chin-Ho Chen, Fisayo A. Olotu, Hao Lin, Mahmoud Soliman, Erik De Clercq, Christophe Pannecouque, Kuo-Hsiung Lee, Dongwei Kang, Xinyong Liu, Peng Zhan

PII: S0223-5234(20)31035-7

DOI: <https://doi.org/10.1016/j.ejmech.2020.113063>

Reference: EJMECH 113063

To appear in: *European Journal of Medicinal Chemistry*

Received Date: 3 November 2020

Revised Date: 22 November 2020

Accepted Date: 28 November 2020

This is a PDF file of an article that has undergone enhancements after acceptance, such as the addition of a cover page and metadata, and formatting for readability, but it is not yet the definitive version of record. This version will undergo additional copyediting, typesetting and review before it is published in its final form, but we are providing this version to give early visibility of the article. Please note that, during the production process, errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
