Activated charcoal supported copper nanoparticles: A readily available and inexpensive heterogeneous catalyst for the N-arylation of primary amides and lactams with aryl iodides

Rong Zhao, Wenwen Dong, Jiangge Teng, Zhiwei Wang, Yunzhong Wang, Jianguo Yang, Qiang Jia, Changhu Chu

PII: S0040-4020(20)31116-9

DOI: <https://doi.org/10.1016/j.tet.2020.131858>

Reference: TET 131858

To appear in: *Tetrahedron*

Received Date: 2 November 2020

Revised Date: 30 November 2020

Accepted Date: 3 December 2020

This is a PDF file of an article that has undergone enhancements after acceptance, such as the addition of a cover page and metadata, and formatting for readability, but it is not yet the definitive version of record. This version will undergo additional copyediting, typesetting and review before it is published in its final form, but we are providing this version to give early visibility of the article. Please note that, during the production process, errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
