

Correction to 2-Pyridone Synthesis Using 2-(Phenylsulfinyl)acetamide

Masaya Fujii, Takuya Nishimura, Takahiro Koshiba, Satoshi Yokoshima, and Tohru Fukuyama* *Org. Lett.* **2013**, *15*(1), 232–234. DOI: 10.1021/ol303320c

Supporting Information

eaks of solvents and impurities had been removed from the NMR spectra reported for compounds **6b** (S21), **6c** (S23), 6g (S29), 6h (S31), 6i (S33), 6k (S37), 6l (S39 and S40), 6m (S41 and S42), 6n (S43 and S44), 4m (S53), 4n (S55), and 4o (S57). Original FIDs were located, and the spectra were reprocessed and have been replaced for the above compounds in the revised Supporting Information submitted with this correction. The spectra editing did not affect any of the conclusions of the published paper. The purities calculated on the basis of the revised spectra and corrected yields are as follows: 6b (99% purity, 67% yield), 6c (98% purity, 39% yield), 6k (94% purity, 83% yield), 6l (90% purity, 74% yield), 6m (97% purity, 70% yield), 6n (89% purity, 72% yield), 4m (99% purity, 79% yield). The samples of 6g, 6h, 6i, 4n, and 4o included some unknown impurities; thus, the exact purity could not be determined.
