

Correction to Enantioselective Baeyer–Villiger Oxidation: Desymmetrization of Meso Cyclic Ketones and Kinetic Resolution of Racemic 2-Arylcyclohexanones

Lin Zhou, Xiaohua Liu, Jie Ji, Yuheng Zhang, Xiaolei Hu, Lili Lin, and Xiaoming Feng*

J. Am. Chem. Soc. **2012**, *134*, 17023–17026. DOI:10.1021/ja309262f

Supporting Information

Pages 17023–17026. The word “meso” defined for the desymmetrization of 4-arylcyclohexanones or 3-arylcyclobutanones is incorrect according to the IUPAC definition. The term “meso” should be replaced in both the original Communication (including the title, the headings to the figures and tables, and the text) and the Supporting Information with the term “prochiral”.
