

## Additions and Corrections

Volume 11, 2009

**Youqian Deng, Yunlong Shi, and Shengming Ma\***

An Efficient Synthesis of 2,5-Dihydrofuran-Fused Bicyclic Skeletons via the Pd(II)-Catalyzed Tandem-Cyclization Reaction of 1, $\omega$ -Bisallenols.

Page 1206, right column, line 8 from the bottom. The sentence “It is important to note that the C=C bond in the products is in the *E*-form, which was established by the NOESY analysis of **2e**.” should read “It is important to note that the C=C bond in the products is in the *E*- (for X = C) or *Z*-form (for X = N, O, SO<sub>2</sub>), which was established by the NOESY analysis of **2e**.”

In the original Supporting Information the names for compounds **2a,b** and **2e–h** were incorrect: “*E*” should be replaced by “*Z*”. A corrected version of the Supporting Information is available with this Correction.
