

n-Dodecyltrimethoxysilane

Chemical structure:

Typical physical properties

Chemical name:	n-Dodecyltrimethoxysilane
CAS No. :	18536-91-9
EINECS No. :	242-409-9
Formula:	C ₁₈ H ₄₀ O ₃ Si
Appearance:	Colorless transparent liquid
Refractive index(n _{25D}):	1.4210-1.4310
Purity:	96%

Applications:

Be used as a water-repellent by impregnation.

Be used for the treatment of mineral fillers and pigments or inorganic surfaces.

Packing:

210L Iron Drum: 180kg/drum

1000L IBC Container: 900kg/container
