

## 3-Aminopropyltrimethoxysilane

### Chemical structure:

### Typical physical properties

Chemical name:	3-Aminopropyltrimethoxysilane
CAS No. :	13822-56-5
EINECS No. :	237-511-5
Formula:	C <sub>6</sub> H <sub>17</sub> NO <sub>3</sub> Si
Appearance:	Colorless to yellowish transparent liquid
Refractive index(n <sub>25D</sub> ) :	1.4165~1.4265
Purity:	98%

### Applications:

Superior adhesion promoter in RTV silicones and other hybrid sealants.

Excellent adhesion promoter for difficult substrates such as  
ABC,PVC ad Poly Styrene.

Useful component in primer systems for hybrid and polyurethane  
sealants.

### Packing:

210L Iron Drum: 200kg/drum

1000L IBC Container: 1000kg/container
