Inspection report

Product name: polyaluminum chloride Production date: 2025.04.17

Product standard number: GB/T22627-2014 Inspection date: 2025.04.17

Batch size: tons Date of factory release: 2025.04.18

Packaging: 25Kg/bag inner plastic and outer compilation Batch number: 0020250417003

Qualitative index	Appearance: yellowish-brown granular		
	Inspecting item	Testing standards	Result
	Mass fraction of alumina (AL ₂ O ₃)%	Industry grade	19.25
	Salinity	≥ 40	112.39
	PH value (10g/L) aqueous solution	3.5~5.0	3.89
Conclusion	The outer bag of the product packaging is a woven bag made of polypropylene material, and the inner bag is made of polyethylene material,Take samples from the film bags by batch. According to the national standard of "Water Treatment Agent Polyaluminum chloride" (GB/T 22627 -2014), sampling inspection was carried out on this batch of products, and the test results are shown in the table above.		 Qualified
