

Chloroprene rubber SN244X series

----- For Adhesive

Characteristics:

- Fast dissolution rate.
- Light adhesive color, high initial adhesive strength, and long adhesion time.

Application:

As one of the most popular grades for adhesives, SN244X can either be used alone or together with other grades to make adhesives for shoes, rubber, leather, wood, metal and construction materials.

Appearance:

White thin chips with talcum as a release agent. No mechanical impurities.

Technical data

Brookfield solution viscosity 34-40

Mass fraction of volatiles (wt.%) ≤ 1.3

Mass fraction of ash (wt.%) ≤ 1.0

Qualification:

1:6 Toluene Xolution viscosity mpa.s	SN244X-1	1000-3000
	SN244X-2	3000-5000
	SN244X-3	5000-7000
	SN244X-4	7000-9000
	SN244X-5	>9000
Mass fraction of volatiles, % \leq	≤ 0.8 (Oven method) /1.3(Roller method)	
Mass fraction of ash, % \leq	1.0
