

Sodium bromide

Molecular formula: NaBr

CAS No.: 7647-15-6

Usage: Mainly used for oil field, medicine, pesticide, water treatment, dye,

perfume, sensitive film, ect.

Product category: Inorganic salt

Molecular weight: 102.89

Physical and Chemical Properties: Colorless cubic crystal or white granular powder; Odorless, taste salty and bitter; Density (g/mL, 25 °C): 3.203. Melting point (DHS) C: 755; Solubility: soluble in water (100 °C the solubility of 121 g / 100 ml water), aqueous solution was neutral. Slightly soluble in alcohol.

Specification:

外观 Appearance	白色结晶粉末		
	White crystalline powder		
项目 Items		技术指标 Technical Index	检测结果 Test
主含量 Main Content		98.5% min	98.7%
氯化物 Chloride (Cl ⁻)		1.0% max	0.56%
水分 Loss on drying		1.0% max	0.28%
PH value of 1 Molar solution at 20℃		6.0-9.0	7.2

Storage: Store in a dry, cool and well ventilated place.

Packing: 25KG/bag
