

# SAFETY DATA SHEETS

According to Globally Harmonized System of Classification and Labelling of Chemicals (GHS) - Sixth revised edition

Version: 1.0

Creation Date: Aug 12, 2017

Revision Date: Aug 12, 2017

---

## 1. Identification

### 1.1 GHS Product identifier

Product name                  raspberry ketone

### 1.2 Other means of identification

Product number              -

Other names                  Oxyphenalon

### 1.3 Recommended use of the chemical and restrictions on use

Identified uses              For industry use only. Fragrances

Uses advised against      no data available

---

## 2. Hazard identification

### 2.1 Classification of the substance or mixture

Not classified.

### 2.2 GHS label elements, including precautionary statements

Pictogram(s)                No symbol.

Signal word                      No signal word.

Hazard statement(s)        none

Precautionary  
statement(s)

Prevention                      none

Response  
none

Storage  
none

Disposal  
none

## 2.3 Other hazards which do not result in classification

none

---

## 3. Composition/information on ingredients

### 3.1 Substances

| Chemical name    | Common names and synonyms | CAS number | EC number | Concentration |
|------------------|---------------------------|------------|-----------|---------------|
| raspberry ketone | raspberry ketone          | 5471-51-2  | none      | 100%          |

---

## 4. First-aid measures

### 4.1 Description of necessary first-aid measures

General advice

Consult a physician. Show this safety data sheet to the doctor in attendance.

If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

In case of skin contact

Wash off with soap and plenty of water. Consult a physician.

In case of eye contact

Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.

If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

### 4.2 Most important symptoms/effects, acute and delayed

no data available

#### 4.3 Indication of immediate medical attention and special treatment needed, if necessary

/SRP:/ Immediate first aid: Ensure that adequate decontamination has been carried out. If patient is not breathing, start artificial respiration, preferably with a demand valve resuscitator, bag-valve-mask device, or pocket mask, as trained. Perform CPR if necessary. Immediately flush contaminated eyes with gently flowing water. Do not induce vomiting. If vomiting occurs, lean patient forward or place on the left side (head-down position, if possible) to maintain an open airway and prevent aspiration. Keep patient quiet and maintain normal body temperature. Obtain medical attention. /Poisons A and B/

---

### 5. Fire-fighting measures

#### 5.1 Extinguishing media

Suitable extinguishing media

Special protective equipment for firefighters: Wear self contained breathing apparatus for fire fighting if necessary

#### 5.2 Specific hazards arising from the chemical

no data available

#### 5.3 Special protective actions for fire-fighters

Wear self-contained breathing apparatus for firefighting if necessary.

---

### 6. Accidental release measures

#### 6.1 Personal precautions, protective equipment and emergency procedures

Use personal protective equipment. Avoid dust formation. Avoid breathing vapours, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust. For personal protection see section 8.

#### 6.2 Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.

## 6.3 Methods and materials for containment and cleaning up

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed containers for disposal.

---

## 7. Handling and storage

### 7.1 Precautions for safe handling

Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Avoid exposure - obtain special instructions before use. Provide appropriate exhaust ventilation at places where dust is formed. For precautions see section 2.2.

### 7.2 Conditions for safe storage, including any incompatibilities

Keep container tightly closed in a dry and well-ventilated place.

---

## 8. Exposure controls/personal protection

### 8.1 Control parameters

Occupational Exposure limit values

no data available

Biological limit values

no data available

### 8.2 Appropriate engineering controls

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

### 8.3 Individual protection measures, such as personal protective equipment (PPE)

Eye/face protection

Safety glasses with side-shields conforming to EN166. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin protection

Wear impervious clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the

specific workplace. Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique(without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it.

Respiratory protection

Wear dust mask when handling large quantities.

Thermal hazards

no data available

---

## 9. Physical and chemical properties

|                                                          |                                                       |
|----------------------------------------------------------|-------------------------------------------------------|
| Physical state                                           | white powder                                          |
| Colour                                                   | Colorless crystals                                    |
| Odour                                                    | Sweet fruity, warm odor resembling raspberry preserve |
| Melting point/ freezing point                            | -85°C(lit.)                                           |
| Boiling point or initial boiling point and boiling range | 117°C/40mmHg(lit.)                                    |
| Flammability                                             | no data available                                     |
| Lower and upper explosion limit / flammability limit     | no data available                                     |
| Flash point                                              | 122°C(lit.)                                           |
| Auto-ignition temperature                                | no data available                                     |
| Decomposition temperature                                | no data available                                     |
| pH                                                       | no data available                                     |
| Kinematic viscosity                                      | no data available                                     |
| Solubility                                               | In water, 25,100 mg/L at 25°C (est)                   |
| Partition coefficient n-octanol/water (log value)        | log Kow = 1.48 (est)                                  |
| Vapour pressure                                          | 5.7X10-4 mm Hg at 25°C (est)                          |
| Density and/or relative density                          | 1.088 g/cm3                                           |

Relative vapour density no data available

Particle characteristics no data available

---

## 10. Stability and reactivity

### 10.1 Reactivity

no data available

### 10.2 Chemical stability

Stable under recommended storage conditions.

### 10.3 Possibility of hazardous reactions

Flammable liquid

### 10.4 Conditions to avoid

no data available

### 10.5 Incompatible materials

Materials to avoid: Strong oxidizing agents

### 10.6 Hazardous decomposition products

When heated to decomposition it emits acrid smoke and irritating fumes.

---

## 11. Toxicological information

Acute toxicity

- Oral: LD50 rabbit acute oral and acute dermal 5 g/kg /p-hydroxyphenylbutanone dissolved in propylene glycol/
- Inhalation: no data available
- Dermal: no data available

Skin corrosion/irritation

no data available

Serious eye damage/irritation

no data available

Respiratory or skin sensitization

no data available

Germ cell mutagenicity

no data available

Carcinogenicity

no data available

Reproductive toxicity

no data available

STOT-single exposure

no data available

STOT-repeated exposure

no data available

Aspiration hazard

no data available

---

## 12. Ecological information

### 12.1 Toxicity

- Toxicity to fish: no data available
- Toxicity to daphnia and other aquatic invertebrates: no data available
- Toxicity to algae: no data available
- Toxicity to microorganisms: no data available

### 12.2 Persistence and degradability

AEROBIC: Data specific to the environmental biodegradation of raspberry ketone were not available(SRC, 2014). However, raspberry ketone is a mono-substituted phenol with a structure suggesting that it may be biodegradable(SRC) in the environment(1). For example, phenol and p-ethylphenol, present at 100 mg/L, reached 85-90% of their theoretical BODs in 4 weeks using an activated sludge inoculum at 30 mg/L in the Japanese MITI test which classified them as readily biodegradable(2).

### 12.3 Bioaccumulative potential

An estimated BCF of 4.4 was calculated in fish for raspberry ketone(SRC), using an estimated log Kow of 1.48(1) and a regression-derived equation(1). According to a classification scheme(2), this BCF suggests the potential for bioconcentration in aquatic organisms is low(SRC).

## 12.4 Mobility in soil

Using a structure estimation method based on molecular connectivity indices(1), the Koc of raspberry ketone can be estimated to be 217(SRC). According to a classification scheme(2), this estimated Koc value suggests that raspberry ketone is expected to have moderate mobility in soil.

## 12.5 Other adverse effects

no data available

---

## 13. Disposal considerations

### 13.1 Disposal methods

#### Product

The material can be disposed of by removal to a licensed chemical destruction plant or by controlled incineration with flue gas scrubbing. Do not contaminate water, foodstuffs, feed or seed by storage or disposal. Do not discharge to sewer systems.

#### Contaminated packaging

Containers can be triply rinsed (or equivalent) and offered for recycling or reconditioning. Alternatively, the packaging can be punctured to make it unusable for other purposes and then be disposed of in a sanitary landfill. Controlled incineration with flue gas scrubbing is possible for combustible packaging materials.

---

## 14. Transport information

### 14.1 UN Number

ADR/RID: UN1479

IMDG: UN1479

IATA: UN1479

### 14.2 UN Proper Shipping Name

ADR/RID: OXIDIZING SOLID, N.O.S.

IMDG: OXIDIZING SOLID, N.O.S.

IATA: OXIDIZING SOLID, N.O.S.

### 14.3 Transport hazard class(es)

ADR/RID: 5.1

IMDG: 5.1

IATA: 5.1

### 14.4 Packing group, if applicable

ADR/RID: III

IMDG: III

IATA: III

### 14.5 Environmental hazards

ADR/RID: no

IMDG: no

IATA: no

### 14.6 Special precautions for user

no data available

### 14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

no data available

---

## 15. Regulatory information

### 15.1 Safety, health and environmental regulations specific for the product in question

| Chemical name                                                            | Common names and synonyms | CAS number | EC number   |
|--------------------------------------------------------------------------|---------------------------|------------|-------------|
| raspberry ketone                                                         | raspberry ketone          | 5471-51-2  | none        |
| European Inventory of Existing Commercial Chemical Substances (EINECS)   |                           |            | Listed.     |
| EC Inventory                                                             |                           |            | Listed.     |
| United States Toxic Substances Control Act (TSCA) Inventory              |                           |            | Listed.     |
| China Catalog of Hazardous chemicals 2015                                |                           |            | Not Listed. |
| New Zealand Inventory of Chemicals (NZIoC)                               |                           |            | Listed.     |
| Philippines Inventory of Chemicals and Chemical Substances (PICCS)       |                           |            | Listed.     |
| Vietnam National Chemical Inventory                                      |                           |            | Listed.     |
| Chinese Chemical Inventory of Existing Chemical Substances (China IECSC) |                           |            | Listed.     |
