CERTIFICATE OF ANALYSIS

Factory price Apramycin Sulfate Powder CAS 41194-16-5

Ampramycin sulfate is mainly used for the prevention and control of pigs, chickens, cattle and other livestock and poultry caused by Escherichia coli, Salmonella dysentery, diarrhea and stunting and other diseases.

It can also be treated as enteritis of fish and shrimp in aquatic products. Ampramycin sulfate for aminocyclic alcohol antibiotics, it is easy to infect livestock and poultry Gram-negative bacteria and part of Gram-positive bacteria have strong antibacterial activity, especially to other antibiotic resistance of pathogens such as Escherichia coli and Salmonella have quite strong antibacterial effect, and not easy to produce drug resistance.

It is mainly used for the prevention and treatment of pigs, chickens, cattle and other livestock and poultry due to Escherichia coli, Salmonella infection caused by dysentery, diarrhea, stunting and other diseases, the efficacy is very significant, is recommended by the FDA as the first choice for the treatment of Escherichia coli drugs.

As a medication-type feed additive, it can increase the weight of livestock and poultry and improve the feed conversion rate, and is widely used in the field of livestock and poultry breeding.

Product name	Ampramycin sulfate
Cas No.	41194-16-5
Molecular Formula	C ₂₁ H ₄₃ N ₅ O ₁₅ S
Appearance	White powder
