Best price Oseltamivir Phosphate CAS 204255-11-8

Rivaroxaban is an oral anticoagulant. It is an orally active direct factor Xa inhibitor. Rivaroxaban is well absorbed from the gut and maximum inhibition of factor Xa occurs four hours after a dose. The effects lasts 8 to 12 hours, but factor Xa activity does not return to normal within 24 hours so once-daily dosing is possible.

There is currently no specific way to reverse the anticoagulant effect of rivaroxaban in the event of a major bleeding event, unlike warfarin.
