Product Technical Data Sheets	
Product Name	Bemotrizinol/BIS-ETHYLHEXYLOXYPHENOL METHOXYPHENYL TRIAZINE /Tinosorb S/UV-627/BEMT
Synonyms Name	Bemotrizinol/BIS-ETHYLHEXYLOXYPHENOL METHOXYPHENYL TRIAZINE /Tinosorb S/UV-627/BEMT
CAS NO.	187393-00-6
MF	C38H49N3O5
MW	627.81
EINECS	425-950-7
Molecular Structure	
Package Standard	1KG/Foil BAG &25KG/Drum/Carton
Product Origin	CHINA
Description	<p>Bemotrizinol, or bis-ethylhexyloxyphenol methoxyphenyl triazine, is an organic UV filter found in over-the-counter sunscreen products. It primarily absorbs UV-A rays. Compared to older broad-spectrum chemical agents, bemotrizinol is more more fat soluble (oil soluble in cosmetic oils) to aid in efficacy and broad-spectrum activity. It is claimed to be photostable, which increases its onset of action and its efficiency in providing protection against UV-rays upon topical application. Bemotrizinol is commonly marketed as Tinosorb S and Escalol S.</p> <p>Bemotrizinol is a broad-spectrum UV absorber, absorbing both UVA and UVB. Bemotrizinol is added to various sunscreens to absorb UV rays.</p>

Application	<p>Bemotrizinol is an active sunscreen agent used in Europe and Australia and will often be paired with less photostable UV blockers such as avobenzone, as the combination creates a much more stable sunscreen that will not degrade and lose its efficacy when exposed to sunlight. In Australia, we need to wear sunscreen every day due to our high rates of skin cancer, and the fact that bemotrizinol can absorb both UVA and UVB rays, providing protection from skin diseases while also not losing effectiveness is an important consideration to make when purchasing sunscreen. Software's Daily Sun Defence SPF50+ protects against both UVA and UVB rays, helping to prevent photoageing, sun spots, and some skin cancers. The lightweight formulation blends seamlessly into the skin, sitting nicely under makeup without leaving a white cast.</p>
Advantages	<p>The bis-ethylhexyloxyphenol methoxyphenyl triazine (Bemotrizinol) is a triazine ultraviolet absorbent, has efficient absorption in ultraviolet bands of UVA (320-400 nm) and UVB (280-320), has high molecular weight, is not easy to be absorbed by skin, has strong stability, and is widely applied to personal care and cosmetic products.</p>
Company Profile	<p>Leader Biochemical is a large leader incorporated industry manufacturers and suppliers of advanced refined Bemotrizinol/BIS-ETHYLHEXYLOXYPHENOL METHOXYPHENYL TRIAZINE/Tinosorb S/UV-627/BEMT. From the year of 1996 when our factory was put into production to year of 2020, our group has successively produced Bemotrizinol/BIS-ETHYLHEXYLOXYPHENOL METHOXYPHENYL TRIAZINE/Tinosorb S/UV-627/BEMT famous reputation.</p>
The spirit of enterprise culture	<p>We believe only good quality can bring good cooperation, quality is our key spirit during our production, we are warmly welcome clients and partner from all over the world contact us for everlasting cooperation, Leader will be your strong, sincere and reliable partner in China.</p>
