5.	FIRE-FIGHTING MEASURES		
5.1	Extinguishing media		
	Suitable extinguishing media		
	For small (incipient) fires, use media such as "alcohol" foam, dry chemical, or carbon dioxide. For large fires, apply water from as far as possible. Use very large quantities (flooding) of water applied as a mist or spray; solid streams of water may be ineffective. Cool all affected containers with flooding quantities of water.		
5.2	Special hazards arising from the substance or mixture		
	Carbon oxides, Hydrogen chloride gas		
5.3	Precautions for fire-fighters		
	Wear self contained breathing apparatus for fire fighting if necessary.		
5.4	Further information		
	Use water spray to cool unopened containers.		
6.	ACCIDENTAL RELEASE MEASURES		
6.1	Personal precautions, protective equipment and emergency procedures		
	Use personal protective equipment. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas.		
6.2	Environmental precautions		
	Prevent further leakage or spillage if safe to do so. Do not let product enter drains.		
6.3	Methods and materials for containment and cleaning up		
	Contain spillage, and then collect with an electrically protected vacuum cleaner or by wet-brushing and place in container for disposal according to local regulations (see section 13). Keep in suitable, closed containers for disposal.		
6.4	Reference to other sections		
	For disposal see section 13.		

7.	HANDLING AND STORAGE		
7.1	Precautions for safe handling		
	Avoid contact with skin and eyes. Avoid inhalation of vapour or mist. Keep away from sources of ignition - No smoking. Take measures to prevent the build up of electrostatic charge.		
7.2	Conditions for safe storage, including any incompatibilities		
	Store in cool place. Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage.		
	Recommended storage temperature: 2 - 8 °C

8.	EXPOSURE CONTROLS/PERSONAL PROTECTION		
8.1	Control parameters		
	Components with workplace control parameters		
8.2	Exposure controls		
	Appropriate engineering controls		
	Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.		
	Personal protective equipment		
	Eye/face protection		
	Tightly fitting safety goggles. Faceshield (8-inch minimum). Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).		
	Skin protection		
	Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.		
	The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it.		
	Body Protection		
	Complete suit protecting against chemicals, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.		
	Respiratory protection		
	Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
