

1 - Product and Company Information

ProductName 3-METHYLPHENYLZINC IODIDE, 0.5M
SOLUTION IN TETRAHYDROFURAN (NO BULK
SALES ALLOWED)

2 - Hazards Identification

SPECIAL INDICATION OF HAZARDS TO HUMANS AND THE ENVIRONMENT

May form explosive peroxides. Harmful if swallowed. Irritating to eyes and skin. Reacts violently with water.

3 - Composition/Information on Ingredients

Product Name	CAS #	EC no	Annex I
3-METHYLPHENYLZINC_IODIDE,_0.5M_SO None LUTION IN TETRAHYDROFURAN	None	None	None
Ingredient Name	Percent	CAS #	EC no
TETRAHYDROFURAN, WITH 85.6 109-99-9 203-726-8 BHT INHIBITOR Symbols: F-Xi R-Phrases: 11-19-36/37			None
Highly flammable. May form explosive peroxides. Irritating to eyes and respiratory system.			
Formula C7H7IZn Molecular Weight 283.4 AMU			

4 - First Aid Measures

AFTER INHALATION

If inhaled, remove to fresh air. If not breathing give artificial respiration. If breathing is difficult, give oxygen.

AFTER SKIN CONTACT

In case of contact, immediately wash skin with soap and copious amounts of water.

AFTER EYE CONTACT

In case of contact with eyes, flush with copious amounts of water for at least 15 minutes. Assure adequate flushing by separating the eyelids with fingers. Call a physician.

AFTER INGESTION

If swallowed, wash out mouth with water provided person is conscious. Call a physician.

5 - Fire Fighting Measures

EXTINGUISHING MEDIA

Suitable: Carbon Dioxide, dry chemical powder, or appropriate foam. Water can be applied as a spray or fog and if properly applied is capable of extinguishing the fire by sweeping the flames off the surface of the burning liquid.

SPECIAL RISKS

Specific Hazard(s): Vapor may travel considerable distance to source of ignition and flash back. Flammable liquid. Emits toxic fumes under fire conditions.

Explosion Hazards: Vapor may travel considerable distance to source of ignition and flash back. Container explosion may occur under fire conditions.

SPECIAL PROTECTIVE EQUIPMENT FOR FIREFIGHTERS

Wear self-contained breathing apparatus and protective clothing to prevent contact with skin and eyes.

SPECIFIC METHOD(S) OF FIRE FIGHTING

Use water spray to cool fire-exposed containers.

6 - Accidental Release Measures

PERSONAL PRECAUTION PROCEDURES TO BE FOLLOWED IN CASE OF LEAK OR SPILL

Evacuate area. Shut off all sources of ignition. Use nonsparking tools.

PROCEDURE(S) OF PERSONAL PRECAUTION(S)

Wear respirator, chemical safety goggles, rubber boots, and heavy rubber gloves.

METHODS FOR CLEANING UP

Cover with dry-lime, sand, or soda ash. Place in covered containers using non-sparking tools and transport outdoors. Ventilate area and wash spill site after material pickup is complete.

7 - Handling and Storage

HANDLING

Directions for Safe Handling: Avoid breathing vapor. Avoid contact with eyes, skin, and clothing. Avoid prolonged or repeated exposure.

STORAGE

Conditions of Storage: Keep tightly closed. Keep away from heat, sparks, and open flame. Handle and store under nitrogen.

Unsuitable: In the absence of inhibitors, tetrahydrofuran tends to absorb and react with oxygen from the air to form explosive peroxides which may detonate when they become concentrated by evaporation or distillation, are combined with other compounds resulting in an explosive mixture or are disturbed by heat, shock, or friction.

Incompatible Materials: Do not allow contact with water

Store at 2-8°C

SPECIAL REQUIREMENTS: Store under inert gas. Do not distill to dryness. Test for peroxide formation periodically and before distillation.

8 - Exposure Controls / Personal Protection

ENGINEERING CONTROLS

Safety shower and eye bath. Use nonsparking tools. Mechanical exhaust required.

GENERAL HYGIENE MEASURES

Wash thoroughly after handling. Wash contaminated clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT

Respiratory Protection: Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU). Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type AXBEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator.

Hand Protection: Compatible chemical-resistant gloves.

Eye Protection: Chemical safety goggles.

9 - Physical and Chemical Properties

Appearance	Physical State: Liquid	
Property	Value	At Temperature or Pressure
pH	N/A	
BP/BP Range	N/A	
MP/MP Range	N/A	
Flash Point	-17.220 °C	Method: closed cup
Flammability	N/A	
Autoignition Temp	N/A	
Oxidizing Properties	N/A	
Explosive Properties	N/A	
Explosion Limits	N/A	
Vapor Pressure	N/A	
SG/Density	0.984 g/cm3	
Partition Coefficient	N/A	
Viscosity	N/A	
Vapor Density	N/A	
Saturated Vapor Conc.	N/A	
Evaporation Rate	N/A	
Bulk Density	N/A	
Decomposition Temp.	N/A	
Solvent Content	N/A	
Water Content	N/A	
Surface Tension	N/A	
Conductivity	N/A	
Miscellaneous Data	N/A	
Solubility	N/A	

10 - Stability and Reactivity

STABILITY

Stable: Stable.

Reactions to Avoid: Test for peroxide formation periodically and before distillation. Do not distill to dryness.

Conditions to Avoid: Do not allow water to enter container because of violent reaction.

Materials to Avoid: Acids, Bases, Oxidizing agents, Oxygen, Reducing agent.

Storage: Will not occur

HAZARDOUS DECOMPOSITION PRODUCTS

Hazardous Decomposition Products: Carbon monoxide, Carbon dioxide, Hydrogen iodide.

HAZARDOUS POLYMERIZATION

Hazardous Polymerization: Will not occur

11 - Toxicological Information

SIGNS AND SYMPTOMS OF EXPOSURE

Coughing, chest pains, difficulty in breathing. Exposure to high airborne concentrations can cause anesthetic effects. To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated. Exposure can cause CNS depression.

Caution: Can cause CNS depression.

Caution: May be harmful if swallowed.

Caution: May be harmful if inhaled.

Caution: May be harmful if absorbed through the skin.

ROUTE OF EXPOSURE

Skin Contact: Causes skin irritation.

Eye Contact: May be harmful if absorbed through the skin.

Inhalation: Causes eye irritation. Material is irritating to mucous membranes and upper respiratory tract.

Ingestion: May be harmful if swallowed.

TARGET ORGAN INFORMATION

Liver, Central nervous system, Kidneys.

CHRONIC EXPOSURE - CARCINOGEN

Result: This product is or contains a component that has been reported to be possibly carcinogenic based on its IARC, ACGIH, NTP, or EPA classification.

12 - Ecological Information

No data available.

13 - Disposal Considerations

SUBSTANCE DISPOSAL

Contact a licensed professional waste disposal service to dispose of this material. Scrub in a chemical incinerator equipped with inert gas.

Material is highly flammable. Observe all fire safety regulations.

Reducing agent.

Hand Protection: Compatible chemical-resistant gloves.

Eye Protection: Chemical safety goggles.

dispose
with an

as this

14 - Transport Information

RID/ADR

UN#: 2056

Class: 3

PG: II

Proper Shipping Name: Tetrahydrofuran solution

IATA

UN#: 2056

Class: 3

PG: II

Proper Shipping Name: Tetrahydrofuran solution

IMDG

UN#: 2056

Proper Shipping Name: Tetrahydrofuran solution

Severe Marine Pollutant

No

15 - Regulatory Information

CLASSIFICATION AND LABELING ACCORDING TO EU DIRECTIVES

HIGHLY FLAMMABLE, Harmful, F-Xn

R-Phrases: 19-22-36/38-14

May form explosive peroxides. Harmful if swallowed. Irritating to eyes and skin. Reacts violently with water.

Caution: Substances which are explosive when wet.

Caution: Substances which are explosive when heated.

Caution: Substances which are explosive when exposed to heat.

Caution: Substances which are explosive when exposed to light.

Caution: Substances which are explosive when exposed to moisture.

Caution: Substances which are explosive when exposed to strong oxidizing agents.

Caution: Substances which are explosive when exposed to strong acids.

Caution: Substances which are explosive when exposed to strong bases.

Caution: Substances which are explosive when exposed to strong oxidizing acids.

Caution: Substances which are explosive when exposed to strong oxidizing bases.

Caution: Substances which are explosive when exposed to strong oxidizing agents.

Caution: Substances which are explosive when exposed to strong oxidizing acids.

Caution: Substances which are explosive when exposed to strong oxidizing bases.

Caution: Substances which are explosive when exposed to strong oxidizing agents.

Caution: Substances which are explosive when exposed to strong oxidizing acids.

Caution: Substances which are explosive when exposed to strong oxidizing bases.

Caution: Substances which are explosive when exposed to strong oxidizing agents.

Caution: Substances which are explosive when exposed to strong oxidizing acids.

Caution: Substances which are explosive when exposed to strong oxidizing bases.

Caution: Substances which are explosive when exposed to strong oxidizing agents.

Caution: Substances which are explosive when exposed to strong oxidizing acids.
