

# A review of large biochemistry analysers

**John Fyffe,**

Clinical Biochemistry, Queen Elizabeth II Hospital, Howlands, Welwyn Garden City, AL7 4HQ, UK

**P. Daga**

Chemical Pathology, Ashford Hospital, Ashford, Middlesex, UK

**and M. J. Roddis**

Chemical Pathology, Edgware General Hospital, Edgware, Middlesex HA8 0AD, UK

## Introduction

In recent years the numbers of large biochemistry analysers on the UK market has significantly increased and it was felt that a review of their specification in a comparative form may help prospective purchasing laboratories select from the large number of analysers available those that would be relevant for their purpose.

## Questionnaire

To this end a questionnaire was sent out in January 1987 to 80 companies in the UK known to be involved in supplying biochemistry laboratories, requesting that a

copy of the questionnaire be completed for each analyser they support on the UK market. The analyser was defined as being able to produce more than 100 test results for any of a group of the 23 most commonly performed biochemistry tests. Twenty-one companies replied positively, providing information for 69 analysers, which is presented in tables 1–16.

## Results

Each table represents the manufacturer's answer to questions on one or more subjects listed at the head of each column. All information presented here has been checked with the manufacturer, however, it should be stressed that the information has come from manufacturers and its validity has not been checked by the authors.

This exercise was carried out earlier, Fyffe [1] in 1985 and an attempt has been made to correct as many anomalies as possible. It is important that the information presented be used as a guide to specifications of analysers and prospective purchasers should check all these details with the appropriate manufacturer before proceeding to purchase.

## Questionnaire

- 1.1 Manufacturer and model.
- 1.2 When was this model first available in UK?
- 1.3 Which tests have available recommended methodologies?
- 1.4 How long do you expect this instrument to be available in the UK?
  
- 2.1 Which samples are acceptable?
- 2.2 What is the sample tray/carriage capacity?
- 2.3 What sample volumes are required to perform the stated groups of analytes? U&E = Na, K, Cl, Bic, Urea, Creat. LFT = Bili, T Prot, Alb, ALP, +3 other Enzymes. BONE = Ca, PO<sub>4</sub>, Alb, ALP. CARD = 3 Enzymes. MISC = Cholesterol, Triglyceride, Urate. GLU = Glucose.
  
- 3.1 How many *samples* of each analyte group could be handled per hour, including calibration and QC? U&E = Na, K, Cl, Bic, Urea, Creat. LFT = Bili, T Prot, Alb, ALP, +3 other Enzymes. BONE = Ca, PO<sub>4</sub>, Alb, ALP. CARD = 3 Enzymes. MISC = Cholesterol, Triglyceride, Urate. GLU = Glucose.
- 3.2 Are tests performed in batches?
- 3.3 What is the maximum batch size? (Where applicable.)
- 3.4 Does the instrument analyse samples selectively, in profiles or both?
- 3.5 What is the maximum number of samples/tests which can be analysed without operator intervention?
- 3.6 Has the instrument been the subject of a DHSS or other independent evaluation? If so, please quote.
- 3.7 What is the claimed within and between batch imprecision for each analyte?
  
- 4.1 What is the recommended frequency of calibration?
- 4.2 (a) Do you recommend aqueous or serum based calibrant?
- 4.2 (b) Can the instrument be calibrated by the operator using his existing assayed material?
- 4.2 (c) How many calibrators are required? Please state max/min.

- 5.1 Can the instrument be safely used for handling high risk samples? (For example Hepatitis B, AIDS.)  
NB. In a normal clinical laboratory environment and using normal laboratory practices.
  - 5.2 Is there a recommended method of decontamination in normal use and before planned maintenance?
  - 5.3 Does the instrument comply with the ESCHLE code for electrical safety? (Ref: *Health Equipment Information*, No. 140, April 1985).
  - 5.4 Please state any BSI standard with which the instrument complies.
- 6.1 Can the routine work be interrupted for stat samples?
  - 6.2 How long would it take to produce a U&E and Glucose result from (a) Start up (b) Standby? U&E = Na, K, Cl, Bic, Urea, Creat, and glucose.
- 7.1 What services are required for installation?
  - 7.2 Is the instrument floor or bench standing?
  - 7.3 How much space is required including service access? (In m.)
  - 7.4 What is the weight? (In kg.)
  - 7.5 Are operator training courses available? If so (a) how long, (b) how many staff, (c) what is the cost?
  - 7.6 How many instruments are installed in the UK?
- 8.1 (a) What is the downtime per year for planned maintenance, not including daily maintenance?  
(b) How long does daily maintenance take (for example of weekly divided by 5 etc.)?
  - 8.2 Which types of service contract are available and at what cost?
  - 8.3 Does the cost of service contract depend on the use of a specific manufacturer's reagents, spares or consumables?
  - 8.4 How long is the warranty?
  - 8.5 Does the warranty depend on the use of a specific manufacturer's reagents, spares or consumables?
  - 8.6 How long do you expect to support maintenance of the instrument?
- 9.1 (a) In its standard form without any optional data manager, can the instrument log/monitor/provide statistics for quality control results?  
(b) As above but with a data manager.
  - 9.2 (a) In its standard form can the instrument hold patient identification and results?  
(b) As above but with a data manager.
  - 9.3 (a) In its standard form what is the storage capacity for QC/PID/RESULTS?  
(b) As above but with a data manager.
  - 9.4 (a) Is the standard instrument fitted with an RS 232/232C compatible ONE way port?  
(b) As above but with a TWO way port.  
(c) If not, please quote price for (a) and (b).
  - 9.5 (a) In its standard form is the report format fixed or user definable for printing results/PID on various sizes of paper?  
(b) As above but with data manager.
  - 9.6 (a) In its standard form is it possible to add results produced on other equipment to the report? (i) For on board chemistries (ii) For other chemistries produced on other instruments?  
(b) As above but with a data manager.
  - 9.7 (a) In its standard form can the instrument produce statistics required for the Korner report including listings for (i) Consultant, (ii) Locality, for example ward, and (iii) Clinical Specialty?  
(b) As above but with a data manager.
  - 9.8 (a) Is help available to link the analyser to an existing or future laboratory computer system?  
(b) If so, what is the approx cost of (i) hardware (ii) software?
- 10.1 What is the basic price of the instrument? (In pounds sterling.)
  - 10.2 (a) Cost of the ISE unit?  
(b) Cost of data manager?  
NB. State if included in 10.1.
  - 10.3 What is the expected recommended reagent cost to perform each group of analytes (see below) on 100 samples?
  - 10.4 If 100 samples were analysed for each of the analyte groups (see below), what would be the cost of the consumables used in the analytical process?
  - 10.5 (a) What is the volume of calibrant required to calibrate all on board chemistries once?  
(b) What is the cost per ml. of the recommended calibrant?  
(c) What is the reconstituted volume and stability of the recommended calibrant?

U&E = Na, K, Cl, Bic, Urea, Creat. LFT = Bili, T Prot, Alb, ALP, +3 other Enzymes. BONE = Ca, PO4, Alb, ALP. CARD = 3 Enzymes. MIS = Cholesterol, Triglyceride, Urate. GLU = Glucose. NB. for ALL, not all tests may be available at any one time.

## Acknowledgements

This work would not have been possible without the generous help and co-operation of the companies manufacturing or marketing the analysers included in this review.

## References and evaluations

Some of the instruments have been subject to DHSS and other evaluations. The following reports listed by instrument entry number in the data-base are available and can provide more detailed information.

ESCHLE Code	:	<i>Health Equipment Information</i> (No. 140, April 1985).
1 Abbott VPS	:	DHSS Evaluation No. STB 3A/85/31.
7 Hitachi 705	:	DHSS Evaluation No. STB 3A/A025.
11 ERIS	:	DHSS Evaluation No. STB 3A/84/25

## 'CHEMICAL SENSORS CLUB NEWS'

The eighth issue of *CSC News* (orders to J. A. Brown, 87 Gower Street, London WC1E 6AA) includes:

The pocket biosensor arrives; Analyticon: Gas and vapour sensors; Sensor research at Durham; Japanese sensor newsletter; Eurosensors 1987; Club database; Biotechnology Equipment Unit; School on Process Analysis.

## ANALYTICA 88

*To be held from 19 to 22 April 1988 in München,  
FR Germany*

Analytica is a trade fair combined with an international conference – the conference this year being 'Biochemical Analytics'.

About a third of the companies participating in ANALYTICA – about 600 firms are expected to register – come from outside FR Germany. It is anticipated that the largest numbers of exhibitors from abroad will be from the UK (37 companies), the USA (31), Switzerland (18), France (9) and Italy (10).

In addition to individual exhibitors, France, the UK, Israel and the USA will also have official joint presentations. The UK's joint presentation includes 18 exhibitors; the exact numbers of exhibitors in the presentations of France, Israel and USA are not yet known.

### *The Conference*

The scientific programme of the 11th International Conference on Biochemical Analysis, 'Biochemical Analytics 88' (chaired by Professor Dr Helmut Greiling, Aachen), will again consist of three parts: symposia, poster exhibition and ANALYTICA Forum Munich.

In 1986 the conference attracted some 1250 participants. The number of visitors is expected to be far higher in 1988. Some 3200 professionals from 40 countries have expressed an interest in the conference.

The symposia will deal with the latest analytical developments both from the point of view of methodology and of the various fields of application. Special attention will be paid to problems of analytics, such as water analytics, including environmental biotechnology, as well as modern methods of molecular biology and gene technology.

In addition to the trade fair, the ANALYTICA Forum Munich provides the exhibiting industry with the opportunity of giving lectures in which companies can present and discuss their latest developments in industrial instrumentation and methodology.
